## Atelier Territorio 2023

The didactic offer of the ATELIER TERRITORIO for the fall semester 2023 consists of the collaboration of three design ateliers sharing the aggregate resources of Professors Bonnet, Collomb and Nunes-Gomes, who deal with large scale in the same geographic area: Ljubljana. We propose, as in previous years, four ateliers that, while maintaining their specificity and teaching autonomy, bring together knowledge of this area by starting the semester with a common path. To walk, to discover, to reflect, to gather everyone's experience and knowledge to reconnect physically with the space; is also to reclaim time, before releasing individually into the adventure of the project.
