Application Form

The ENVIRONMENT it's right here!

One of the major challenges of our time is to rethink what we mean by «environment». It is now essential to readjust our view of it, to rethink the notion of the environment as a space that is part of us, with which we are inextricably linked - a spatiality that exists among, with, between, through and within us.

The aim of this WORKSHOP is to nourish our imagination and to broaden the scope of our environmental sensitivity, through another possible experience of our own living space. Students are invited to carry out artistic-landscape-architectural interventions including the local community in the process. These ephemeral interventions will be carried out IN SITU in the industrial and commercial zone of Mendrisio. The aim is to discover, experiment and take a new look at our living space, to understand, feel, see and live the notion of environment with «enlarged senses».

At the end of the Workshop we will share these interventions in a PUBLIC EVENT.
